

## COMPANY MISSION STATEMENT

**For ourselves** - We are committed to be a long term, professional company in the security market, through the operation of 'long term', ethical, profitable contractually compliant contracts. Through the achievement of this, we aim to provide rewarding, secure, long term careers for all of our staff. We also aim to provide 'year on year' growth for the company producing healthy profits, after the necessary investments have been made.

It is always our aim to maintain a professional and safe working environment for all staff.

**For our Clients** - We are committed to understanding our clients' business, so that we are able, through the delivery of our service, to add-value to those processes, thus helping our clients to achieve superior performance, as well as securing their staff, their buildings and their property – i.e. their business!

We always aim to work within 'a partnership' which will be mutually beneficial to both parties.

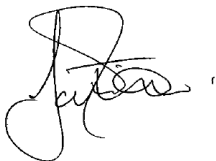

**Our values are** - To provide a first class service at all times - no exceptions, to manage and control our own activities as effectively as possible, using the skills we hold focusing continually on client satisfaction. These values are upheld through a process of continuous monitoring/improvement, driven by our strong/effective leadership and operated within our Quality systems.

**Our continued objective encapsulating our mission statement and values are to enable our clients to run their business as effectively and efficiently as possible.**

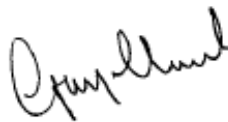

**Our vision** - We see City Security Services as having a reputation as a dependable, professional and quality orientated Security Company, delivering a service which our clients can be confident in.

We ourselves, see our size as being a medium sized security company within our industry sector. Our pricing policy will remain competitive but we will never seek to provide 'cheap' services. Our staff, who are recognisable, smart, well trained and have a 'can do' attitude, are always acting as ambassadors for both our clients and our company; always being proud to say who they work for and what they do.

We aim to better the perception of the security industry as a whole by constantly striving to produce the best possible service.
